# A Simple Guide to Design Your Square Coaster

You need to select Photo Gifts from the list of products available in our software.
Once you have done this you can select Square Coasters and enter a project name.
You will be taken to project screen to design your coaster.

NB: Please ignore the initial message from the assistant that may appear. This does not provide an accurate guide for your coaster design.

SQUARE COASTER with curved edges

The template to use for your Square Coaster has 2 Red Lines – one a continuous line and the other red dashes.
Please be guided by the Red Dashed lines. This is where the coaster will be cut. Any areas of your image exceeding this line will not be printed on your coaster.

Previewing Your Design -IMPORTANT

Unfortunately the preview function provided for coasters is currently not accurate in our software designer. Your image may not appear is it does in the preview. Please be guided by the project screen for the design and look of your coaster.
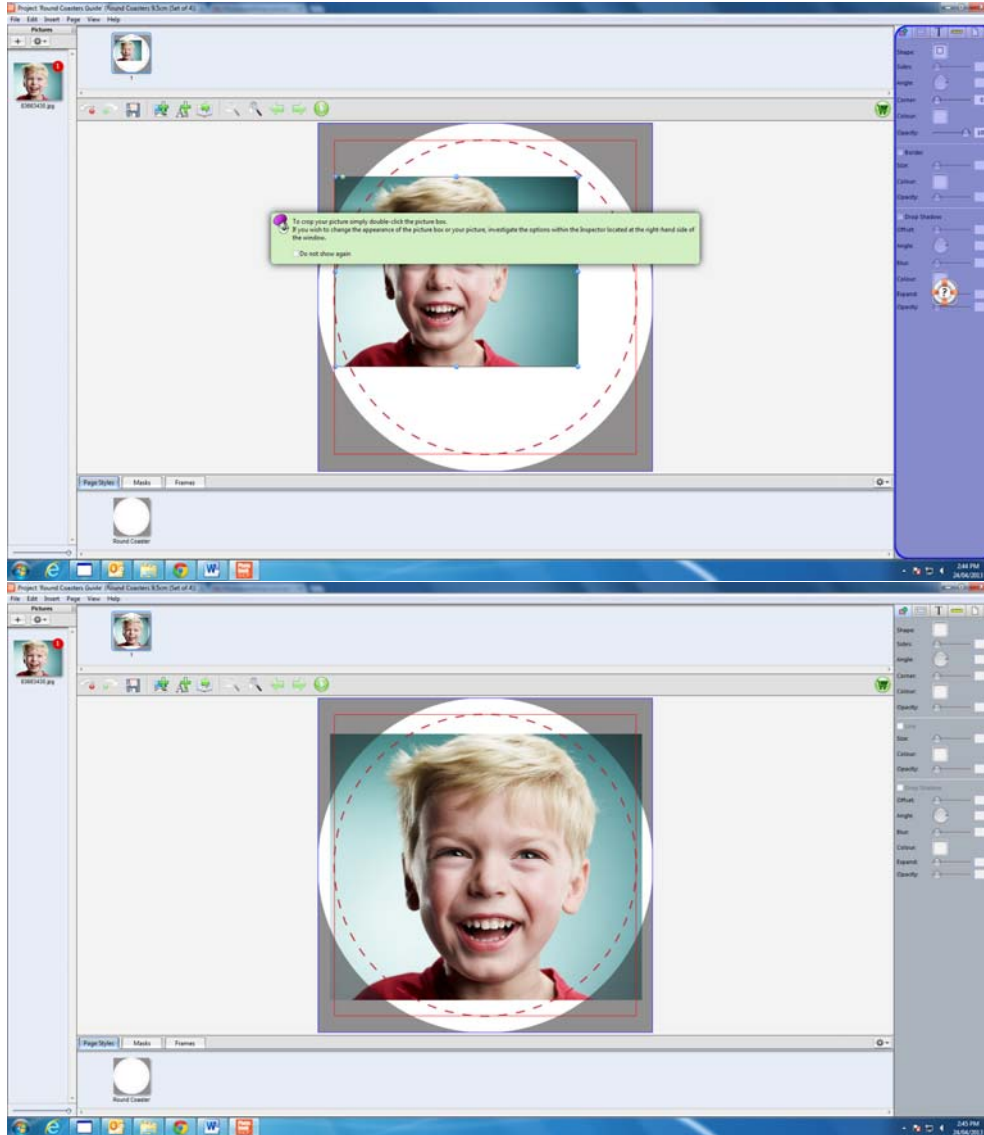

Ordering

Once you are happy with your design you can place your order. Please follow the prompts and ensure your details are correct. You will be able to enter your voucher code at the final order page.

A Simple Guide to Design Your Round Coaster

You need to select Photo Gifts from the list of products available in our software.
Once you have done this you can select Round Coasters and enter a project name.
You will be taken to project screen to design your coaster.

NB: *Please ignore the initial message from the assistant that may appear. This does not provide an accurate guide for your coaster design.*

ROUND COASTER

The template to use for your Round Coaster has 2 Red Lines – one a continuous line and the other red dashes.
Please be guided by the Red Dashed lines (the circle). This is where the coaster will be cut. Any areas of your image exceeding this line and within the grey areas will NOT be printed on your coaster.
